# FRUITS, TREES AND FLOWERS

FALL 1935

Evergreens add winter beauty to the planting

## PLANT THIS FALL

Experience has shown there is a big advantage in fall planting of almost all varieties of hardy trees, shrubs and flowers. The earth becomes settled about the roots, new feeding rootlets are formed before severely cold weather, and they are ready to start into growth with the first coming of spring. In the fall the assortment is most complete, and the work is out of the way before the spring rush begins.

Planting of Peonies and Irises may begin in early September, other Hardy Flowers and Evergreens usually latter September or early October, Shade Trees and Shrubs when we have good frosts that start the leaves dropping naturally. Strawberries, Cannas, Dahlias and Gladiolus will be quoted in the spring catalog.

## Water Lilies all Summer

To have hardy Water Lilies blooming all summer, beginning in May, you need only a pool, 8-12 in. of soil, a foot of water and sun. Prices 40c up. Write for list of varieties.

## Hardy Evergreens

Pfitzer Juniper thrives in almost every location

Our evergreens are grown with plenty of room and are compact, well filled trees of their size and variety. They have been transplanted and root pruned and are well rooted. They are not grown rapidly and soft but are firm and easily transplanted. They are liberally graded. With the exception of the "mail size" they will be dug with a ball of earth wrapped in burlap, termed "balled and burlapped" or B. & B.

### MAIL SIZES, POSTPAID

Our mail size are transplanted, sturdy little trees, not balled and burlapped as these sizes do not require it. The value of trees cannot be shown in a catalog. A mail size evergreen may be worth a dime or a dollar. It may be a spindling little tree that requires petting, or a well grown tree that with reasonable care gives good results. We intend to give you your money's worth. Plant these mail sizes firmly, water them as the season requires and they should give you good results. They are not yet old enough and large enough to give the immediate effect of balled and burlapped sizes. Give them time to grow into larger sizes and we think they will please you. B. & B. trees cannot be sent by mail.

Five or more of a kind at the 10 rate, less at each rate.

**Arborvitae, Baker's.** An upright Chinese Arborvitae, growing about 8 ft. high; foliage light green; fairly rapid growth.

## Liberty Irises; Fleur de lis

Plant lots of Irises for their grand and royal colors and their beauty of form and texture. Mass them at the borders of the lawn, or among shrubbery. Plant them along walks and drives, and in the herbaceous border.

They are perfectly hardy.

They are easy to grow.

They usually bloom the first season.

They increase rapidly.

They grow in almost any soil.

They furnish a wealth of color in May.

The standards are the upright or standing petals, the falls the lower or drooping petals. The inches or feet in the descriptions is the height of the flower stems.

SPECIAL IRIS COLLECTION

Liberty Irises, assorted, our selection, named: Half dozen, 3 varieties, 50c (postpaid, 60c); one dozen, 6 varieties, \$1.00 (postpaid, \$1.15); twenty-five, 8 varieties, \$1.75 (postpaid, \$2.00); one hundred, 8 varieties, \$5.00 (postpaid, \$6.00).

## Japanese Irises

Foliage tall, narrow, blade-like; stems slender, graceful, with several buds to the stem; large flat flowers, usually with a gold blotch, blooming later than the Liberty Irises. Plant in full sun in any good mellow loam that does not become excessively dry; very effective along a stream or pool. Water must not stand on the roots. Six-petaled are termed double, three-petaled, single.

**White.** Early, double, 25c each, 3 for 70c, \$2.50 per doz.

## Peonies are Easily Grown

Hardy as the oak, Peonies are so easily grown that little need be said. Often, in neglected gardens, one sees large clumps that have flourished and bloomed for years. Yet they amply repay all attention given them. They thrive in almost any good, well drained soil, are best in full sun but succeed with shade part of the day. Plant 3 feet apart. The early varieties usually begin blooming here about May 5 to 8.

The name and date in parenthesis is the originator or introducer and date of introduction. The guards are the wide outer petals. The type of flower is designated as follows:

**Crown.** Wide center or crown petals with narrower, shorter petals forming a collar or ring between them and the guards.

**Bomb.** Center petals of uniform width but narrower than the guards and forming a globe within the guards.

**Semi-rose.** Flowers that would be classed as rose but for an occasional pollen bearing stamen.

**Rose.** Perfectly full, all petals wide, no stamens. The center petals may not be as wide as the guards but if quite distinct it would be a bomb.

### PEONY SIZES AND PRICES

Prices quoted are for good strong divisions of 3 to 5 eyes from blooming plants. We consider them fully equal to one-year plants usually sent out. If you want something larger order 5 to 8 eyes at fifty per cent advance or 8 to 10 eyes at double the printed price. 3 of a kind at dozen rates.

### PEONIES BY PARCEL POST

If wanted by parcel post allow 8c for the first plant and 2c for each additional plant if within 150 miles of Sarcoxie. For the balance of Missouri and adjoining states 10c for the first plant and 3c for each additional plant. For more distant states 15c for the first plant and 8c for each additional plant. Any balance will be refunded.
